Editorial Welcome

WELCOME

to Issue 11. One more and we will have been going for a full year (who'd a thought it!) Its all thanks to the support we get from you guys. On

a similar note we would like to ask that copies of 3DCreative are not put on central servers or shared around as this is beginning to seriously harm the future production of the magazines and we are trying our best to make the mag better every month!

TECHNIQUES AND TUTORIALS

2 Tutorials finish this month, both the Alpine car modeling and the Texturing Masterclass. These will be replaced with new ones next month. If you are following these tutorials please let us know if they are helping! Swordmaster part 3 of 8 and an exclusive 'Science of Colour' tutorial should keep you busy.

INSPIRATION

We haven't gone totally Ice Age crazy but the new article and interview with director Carlos Saldanha is a must view!

INDUSTRY

Some interesting news covering some of the latest CG industry goings on...

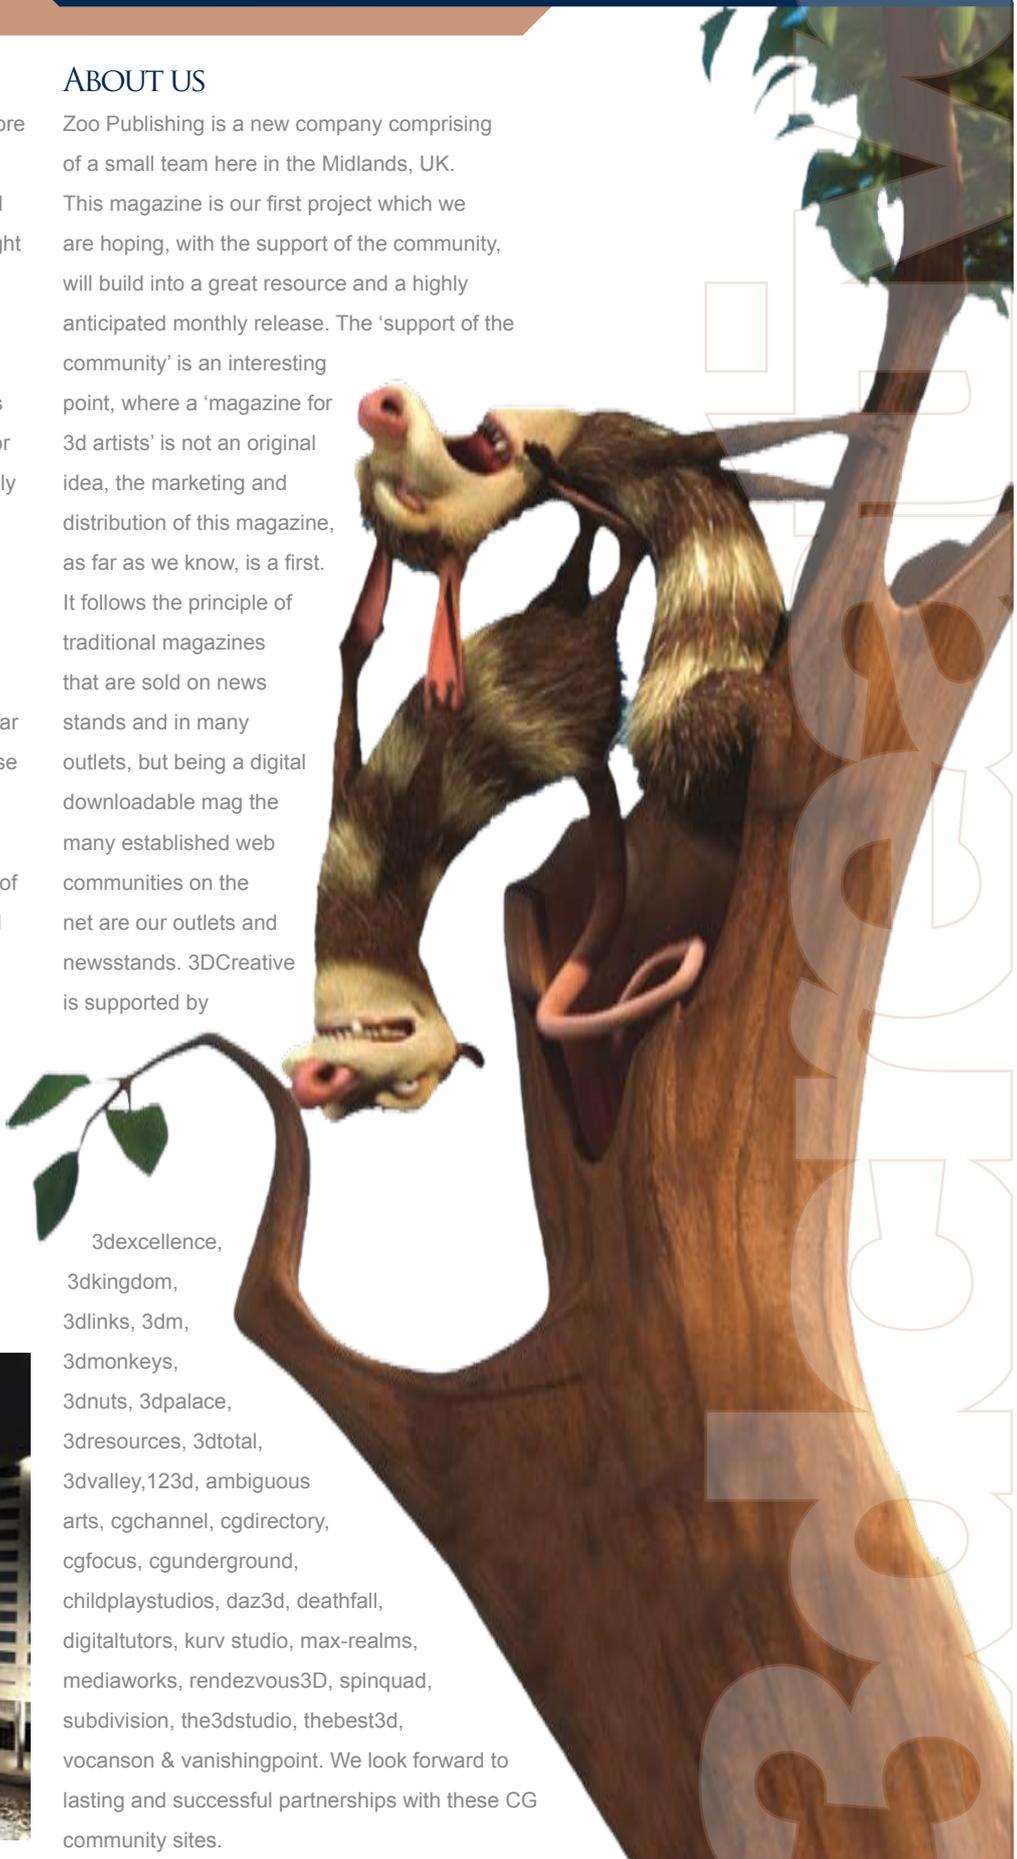

ABOUT US

Zoo Publishing is a new company comprising of a small team here in the Midlands, UK.

This magazine is our first project which we are hoping, with the support of the community, will build into a great resource and a highly anticipated monthly release. The 'support of the community' is an interesting point, where a 'magazine for 3d artists' is not an original idea, the marketing and distribution of this magazine, as far as we know, is a first.

It follows the principle of traditional magazines that are sold on news stands and in many outlets, but being a digital downloadable mag the many established web communities on the net are our outlets and newsstands. 3DCreative is supported by

3dexcellence,
3dkingdom,
3dlinks, 3dm,
3dmonkeys,
3dnuts, 3dpalace,
3dresources, 3dtotal,
3dvalley,123d, ambiguous
arts, cgchannel, cgdirectory,
cgfocus, cgunderground,
childplaystudios, daz3d, deathfall,
digitaltutors, kurv studio, max-realms,
mediaworks, rendezvous3D, spinquad,
subdivision, the3dstudio, thebest3d,
vocanson & vanishingpoint. We look forward to lasting and successful partnerships with these CG community sites.

SuperMaster

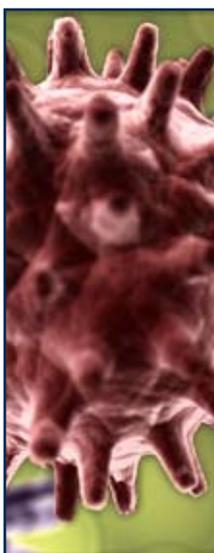

Vojislav Milanovic

3D modeler, animator, & vfx compositor, Anigraph studio, Self taught all-round 3D guy, started to doodle around in 3D about

8 years ago. In the last 5 years I have done a lot of various things from print and TV ads to gaming & movie graphics. Currently involved in multimedia study & character developing for an animated feature movie. One of my goals is to make my own animated movie

vojo@teol.net

<http://users.teol.net>

Luciano Iurino

I started back in 1994 with 3DStudio on MS-Dos as modeler/texture artist. In 2001 I co-founded PM Studios & I still work for it as Lead 3D Artist. Recently we have developed the videogame "ETROM - The Astral Essence". I also work as freelancer for different magazines, web-portals, gfx and videogame companies. Recently I left the 3dsmax environment to move on XSI.

iuri@pmstudios.it

Niki Bartucci

Freelance 3d modeler, Italy. I started working in the field of Computer Graphics in 2000 as an illustrator & web designer. In

2003 I started using 3d software such as C4D & later 3dsMax. That year I worked on ETROM - The Astral Essence, RPG video-game for PC, developed by PMstudios. Currently I'm a freelancer & specialise in commercials. I especially like RPG & RTS video-games.

niki@pikoandniki.com

www.pikoandniki.com

Giuseppe Guglielmucci

Freelance 3d modeler / Animator. I began to use computers with the epoch of the vic20 & Cinema4d was my 1st 3d software. I started working in the field of CG in 1999 in commercial design. In 2003 I worked on ETROM - The Astral Essence, RPG video-game for PC, developed by PMstudios. Currently I'm hoping to work in the video-games industry and develop my own game.

The Original Total Texture collection was created in 2001, utilising the best methods and technology of the time. Since then, techniques and technology have both moved forward, and here at 3DTotal we felt that although the original collection is still widely used and highly regarded among artists and studios of all calibers, it was time for an update...

totalTextures

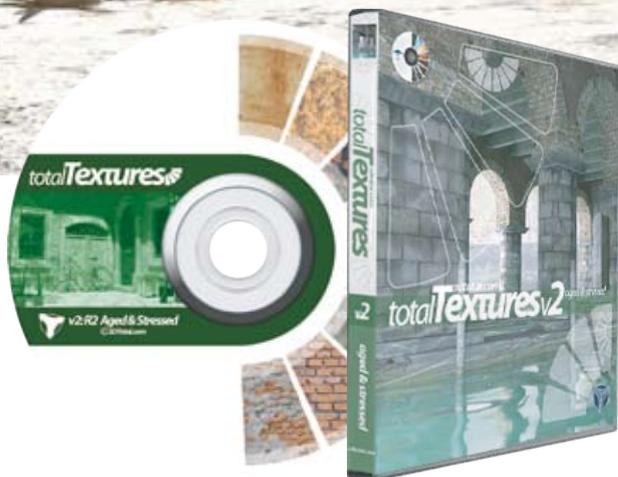

v2: r2
aged & stressed

now more content!

This enormously improved version of the original texture collection now contains 138 individual Materials, comprising of over 550 individual, hand crafted texture maps and are all fully tileable. Every Texture now has its own unique colour map, bump map, specular, & normal map.

What's new? : Total Textures v2 original collection consisted of 101 materials comprising 202 individual maps (Colour & Bump maps). This new collection consists of 150 materials, comprising of 600 individual maps!! (Colour, Bump, Specular and Normal maps). Each individual material now has a unique matching bump, specular and normal map.

Bonus Maps Include dirt masks, shadow maps, skies and reference photos. This new improved version of the Original Collection is now more versatile, broader ranging and larger then ever. There are 53 Bonus maps included on this DVD plus 44 reference photos used in the creation of this collection.

DVD Contents:

- 29 Brick Textures
- 23 Metal Textures
- 19 Miscellaneous Textures
- 5 Paint Textures
- 8 Plaster Textures
- 25 Stone Textures
- 18 Wall Textures
- 23 Wood Textures
- 31 Dirt Masks
- 7 Shadow Maps
- 15 Skies

15 Collections of amazing Textures

for full information and pricing including discounts of up to 25% visit www.3dtotal.com
Existing v1 owners can get the new upgrade for only \$29 usd! thats for 3x more content than the original!

Mihai an interview with ANGHELESCU

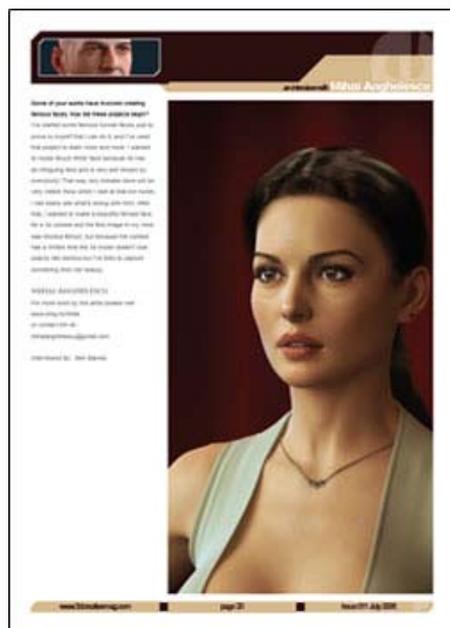

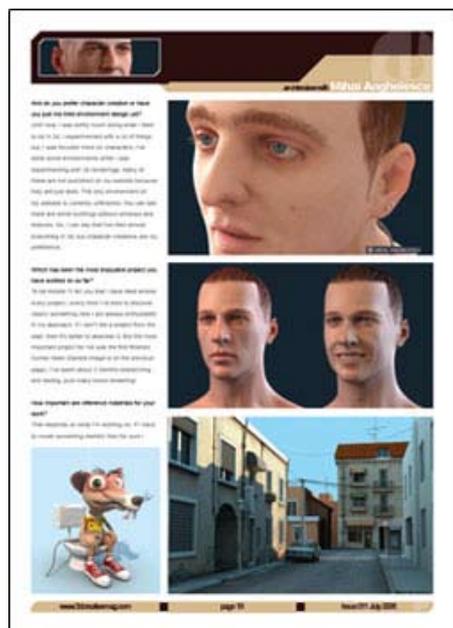

This month we talk with Mihai, a professional 3D Artist who makes amazing photorealistic characters...

Mihai Anghelescu an interview with

Mihai ANGHELESCU

HOW IMPORTANT ARE REFERENCE MATERIALS FOR YOUR WORK?
THAT DEPENDS ON WHAT I'M WORKING ON. IF I HAVE TO MODEL SOMETHING REALISTIC THEN FOR SURE I WILL NEED MANY (AND GOOD) REFERENCES FOR ANY DETAILS I WANT TO STUDY. IF I'M DOING SOMETHING BASED ON MY IMAGINATION, THEN REFERENCES ARE ALREADY IN MY MIND AND MORE IMPORTANT IS A CLEAR IDEA OF WHAT I'M DOING. BUT USUALLY REFERENCES ARE VERY IMPORTANT FOR ME WHEN I'M DOING STUDIES LIKE; LIGHTING, PROPORTIONS, EXPRESSIONS, SKIN PROPERTIES, ANIMATION ETC.

TO SEE WHAT ELSE WE ASK MIHAI, BUY THE FULL ISSUE OF 3DCREATIVE MAGAZINE. AVAILABLE NOW!

This month we talk to Vietnamese digital artist,
Richard Minh Le...

What was it that drew you to studying architecture as a degree?

Well, the main reason why I chose to pursue a degree in architecture comes from my childhood. My parents are architects back in Vietnam; so tracing paper, colour pencils and cardboard models were my playing toys. For a long time, I was conscious about structures and buildings as well as the originality of ideas. With the help of my parents, I slowly, but surely, realised that architecture and other art fields have so many connections. Although I was not sure about having a life-time commitment to architecture, I still decided to do a degree in

architecture because I thought it would be great to take it as a base to further explore other art forms. Also, I have no regrets about choosing the architecture program at RMIT University. The way the course is structured is really what I expected: students are engaged to go beyond architecture and think as designers rather than just as architects.

You mention on your website that you have always enjoyed comics and cartoons. Did you ever think of pursuing this interest as opposed to focusing on architecture?

Sometimes, it is kind of strange when what you enjoy watching is not what you end up doing or making. I did actually think of pursuing a

an interview with:

Richard Minh Le

career in comics and cartoons, especially after watching The Lion King movie and behind the scenes footage. However, I reckon I lacked the courage and also faced the financial issue of pursuing it. On the other hand, architecture interested me for a long time and I felt much more confident to step in.

How do you think 3D packages, such as Max, have changed the way architects work and visualize their projects?

I can say that I am one of those people who witnessed a revolutionary change that 3D packages have made in the way architects and designers see their projects. Architects, traditionally, worked with physical models. While they are handy and convenient because one can touch and play with them, they present great disadvantages when it comes to time, budget and technical difficulty to realise the designer's particular vision. However, 3D packages like Max allow faster feedback and greater creativeness. This is even more

true when Global Illumination is getting more accessible and less expensive. Architects and their clients nowadays don't have to imagine, but enjoy seeing the reality of the designs even before they get built. At RushWright Associates, a landscape architecture office where I am working as a full-time 3D artist, we are going beyond the traditional method (plan, section and physical model) of presenting our design and looking into GI-based 3D rendering and animation to help our design process and its communication. I believe it is a great breakthrough for us.

"I BELIEVE THAT YOU CAN HAVE A GREAT, DETAILED, WELL MODEL, TEXTURED, BUT IF YOU FAIL TO LIGHT AND/OR ANIMATE IT, YOU FAIL TO BREATHE LIFE INTO IT."

What aspects of 3D interest you the most and where would you say you are strongest in relation to your 3D skills ?

I am best at lighting and animation. They interest me so much because they are the most powerful areas in 3D that truly create the illusion of life. I believe that you can have a great, detailed, well model, textured, but if you fail to light and/or animate it, you fail to breathe life into it. I think, in relation to my 3D skills, I am strongest at co-operating the strength of each process to achieve the highest level of quality and productivity.

I notice from your portfolio that you have experimented with Vray, Brazil and Mental Ray. Which of the three do you prefer and why?

Well, I was first introduced to Global Illumination when Max6 and its built-in Mental Ray was released. Then, I touched upon Vray because I was so curious about its popularity in the area of archi-viz. I only used Brazil once when I helped a friend of mine who was doing his final-year project. Out of the three, I prefer Vray the most because it is easy to learn and not too hard to master. Vray has many different GI methods

that allows flexibility to create desired images in a given timeframe. Irradian map is amazing as you can send out thousands of frames to render without re-calculating it over and over again. Vray, however, is not as strong in photon-mapping as Mental Ray and it would be lovely to see a hybrid in this area. For me, Mental Ray is still hard to use and troubleshoot given that it is the industry standard and capable of creating stunning images. I think I will have to look into

it a lot more before feeling comfortable about lighting in the visual effect industry.

You also mention on your website that you have aspirations to work in VFX as well as animation. What type of job would you ideally like to do?

Obviously, I would be interested in lighting and animation which I have the biggest passion for. Beside those, I'd love to get my hands on effects and further develop my matte painting skills.

Which films would you say have been the most successful in implementing CG and which would you say fail and why?

I would say 'King Kong' and 'Narnia', which have been released since last year, are the most successful in implementing CG. The visual effects for both go beyond the task of creating and enhancing the look of the film, and effectively breathe life into the characters in a unique way. CGI amazingly brings us the world of Narnia and the fantasy characters living within, in particular the work on Aslan and the armies on both sides. The digital actor, King Kong, who doesn't talk, greatly captures the sense of emotion and magnificently helps delivering a story about love to the audience. Perhaps, the Academy Award should have a category of best digital actor? I will be waiting to see that.

I think as long as CG stays as a supporting element and reaches the necessary technical level, it should not fail the movie. For those films I have watched, it is hard to pin-point which fail to implement CG. People talked about 'A Sound of Thunder' - and how bad both story & visual effects are. I, myself, haven't had chance to watch it. Maybe I should...

"I THINK AS LONG AS CG STAYS AS A SUPPORTING ELEMENT AND REACHES THE NECESSARY TECHNICAL LEVEL, IT SHOULD NOT FAIL THE MOVIE."

Does Australia offer many opportunities for anyone wishing to pursue a field in computer graphics, in particular film?

I think computer graphics, especially VFX for film in Australia, is growing dramatically. However, it has a small market and relies heavily on the international one. Therefore, opportunities for anyone wishing to make a break in the industry are rare, as most major studios like Rising Sun Pictures or Animal Logic, only hire senior-level and highly-experienced artists. I think pursuing computer graphics

academically is easier in Australia, particularly in Melbourne. The Academy-Award nominated short 'Birthday Boy' created by a graduate from Victorian Center of Art (VCA), and many other local and international awards, were given to RMIT's graduates. For anyone interested in CGI, it would be worthwhile pursuing a degree in either of these two schools. A degree can be a good base to get into the industry.

Apart from architecture what subjects particularly interest you from an artistic point of view?

I do enjoy photography, cinematography, painting, graphic design, animation (obviously!) and visual effects. They all help me to see art in a different way and balance my artistic vision. Also, because film-making and visual effects are highly-collaborative fields, I think having a good

understanding of other principles will greatly help me to accomplish my own ambitions.

You have examples of both 2 and 3D work, traditional and digital. What do you feel are the merits of each discipline and do you see relationships between them?

Obviously, there are relationships between them. At the simplest level they both start with nothing and end up together with stunning images at a given timeframe. I feel the merits of each discipline are that each opens up artists to different ways of looking at a shot and how to create it. The techniques of both are cross-transferable and greatly improve the productivity in a project. 3D is taking an important role in the pre-viz process while 2D concept and matte painting remain the key to realising the design and take the final shot to another level.

You have also touched upon Matte painting it seems. What do you think are the most problematic challenges faced by a newcomer when coming from either a 3d background or a purely 2D painting approach?

In my experience a 3D artist faces fewer technical problems than his 2D counterpart because of the tools. However, I think the main problematic aspect of working in this field - no matter what background an artist is from - is how an artist can use his own skill to achieve the highest level of quality and productivity for the final shots. It can take years of intensive practice. In addition, a newcomer will have a problem if he doesn't develop his own artistic vision and truly understand the concept of realism - how a real photo can look so fake. Tools are important but problematic when they overshadow one's artistic ability.

“...NO MATTER WHAT BACKGROUND AN ARTIST IS FROM...[HE] CAN USE HIS OWN SKILL TO ACHIEVE THE HIGHEST LEVEL OF QUALITY AND PRODUCTIVITY...”

Which have been the most enjoyable projects to work on and which have proved the most challenging to date?

The most enjoyable and challenging projects to me were the two architectural ones I did at school in my second and third years. The first was more science-fictional than the second but they both implemented animation, digital deformation, particle simulation and sound editing as a way of looking at circulation within an urban-scale space and the relationship between different programmatic volumes created by mathematics-driven structures.

Finally what would you like to be doing in five years time?

In five years time, I would love to direct my own short and have more time to write as many tutorials as possible as a way of sharing my knowledge, and help others the way I was helped by artists who wrote great tutorials to get me started.

Thanks for taking the time to talk to us.

You are welcome.

*A new dimension
for MOTION
GRAPHICS*

MoGraph

MAXON's new MoGraph module introduces motion graphics artists to a new dimension...

...beyond merely transitioning from 2D to 3D. A new dimension of unparalleled speed and simplicity with which breathtaking animations can be created.

MoGraph's easy to use toolset makes it a snap to put your ideas in motion. Objects can be arranged and transitioned in a myriad of ways, with astonishing speed. They can be made to move to the rhythm of a beat – with a natural motion, thanks to such automatic effects as overshoot and inheritance, without having to animate the objects manually!

MoGraph for CINEMA 4D is the ideal 3D supplement for your current MAXON software palette. Perfect connectivity to leading compositing applications such as Adobe After Effects, Apple Final Cut Pro, Autodesk Combustion and many more guarantees that the look and coloration of your project can be matched exactly.

**Want to know more? Then visit us online and download your free Windows* or Macintosh* demoverion at:
WWW.MAXON.NET**

*MAXON Software is available for Windows 32-bit und 64-bit and for Macintosh. Macintosh versions also available as Universal Binary for PowerPC and Intel processors.

BREAKING SCION IN

BRAND CAMPAIGN INSPIRES WITH STUNNING AUDIOVISUAL ALCHEMY

BREAKING SCION IN
BRAND CAMPAIGN INSPIRES WITH STUNNING AUDIOVISUAL ALCHEMY

When it comes to creating a brand identity, there are few things more powerful than a well-executed brand campaign. The brand identity of a company is the visual and verbal elements that represent the company and its products. A brand identity is a key element of a company's marketing strategy and can be used to create a strong and consistent brand image.

The brand identity of a company is the visual and verbal elements that represent the company and its products. A brand identity is a key element of a company's marketing strategy and can be used to create a strong and consistent brand image.

DIGITAL ART MASTERS

Starting this month and for the next 6 months, we have exclusive chapters from 3DTotal.com's new book 'Digital Art Masters'. The book is more than just an artwork book as not only does it feature full colour, full page images, each artist has described the creation process in their own words, and exclusively for this book. This month we feature:

'Arabian Warrior Horse'
by Khalid Al-Muharraqi

Rustboy Vinyl Toy limited edition

Brian Taylor's "Rustboy" is the lead-character in a 3D animation project done on a low-budget in-home basis. Thanks to the innovative Android8, Rustboy is now a lovable yet quirky vinyl toy, with 7 points of articulation, including eyes! Standing at 7" tall and limited to 850, 3DCreative have 2 of these toys to give away.

WIN!

A LIMITED EDITION RUSTBOY VINYL TOY

ANDROID

Competition Sponsor www.android8.com

For a chance to win one of the two Limited Edition Rustboy Vinyl Toys (colours may vary) up for grabs, all you have to do is answer correctly the question below.

RUSTBOY IS THE CREATION OF BRIAN TAYLOR, BUT CAN YOU TELL US WHAT 3D PACKAGE DID HE USE TO CREATE RUSTBOY?

Email your entry to competitions@zoopublishing.com with the words "RustBoy Toy" in the subject line. To help us issue prizes quickly, please include your name, email address and postal address clearly in your email. All entries received by 1st August will be entered into a prize draw. The two winners will be notified by e-mail.

After a huge response to last month's competition, here are the winners, congratulations to all!

KRISTOFFER HÄGELSTAM AND
MIGUEL ANGEL BUÑUALES BERGASA

Rules: Zoo Publishing decision is final and there are no cash alternatives. No other correspondence will be entered into. Any entry that is late, illegible, incomplete or otherwise does not comply with the rules may be deemed invalid at the sole discretion of Zoo Publishing. Your details will be held on record by Zoo Publishing but will not be passed on to third parties. Please note that in the event of becoming a winner of this competition, your details may need to be passed on to our competition sponsor for your prize to be sent out direct, however they must not use your contact information for any other purpose than to issue your prize.

LOOKING FOR A REWARDING CAREER AND RELAXED AUSTRALIAN LIFESTYLE?

Are you motivated, enthusiastic and share our passion for games? We are looking for you!

Based in sunny Brisbane, Australia, Krome Studios, Australia's largest games development company, can offer not only a rewarding and challenging career, but also a great lifestyle in a beautiful city.

We are currently developing titles for next generation consoles as well as Playstation2, Xbox, Nintendo GameCube, Sony PSP, GameBoy Advance, Nintendo DS and PC, and need experienced staff to contribute to the development of AAA titles.

With a solid track record and a bright future ahead, there's never been a better time to join Krome Studios.

We are looking to recruit for the following positions:

- Programmers
- Environment Artists
- Prop Artists
- Animators

Applications including a Cover Letter, CV and examples of work can be sent to humanresources@kromestudios.com or to

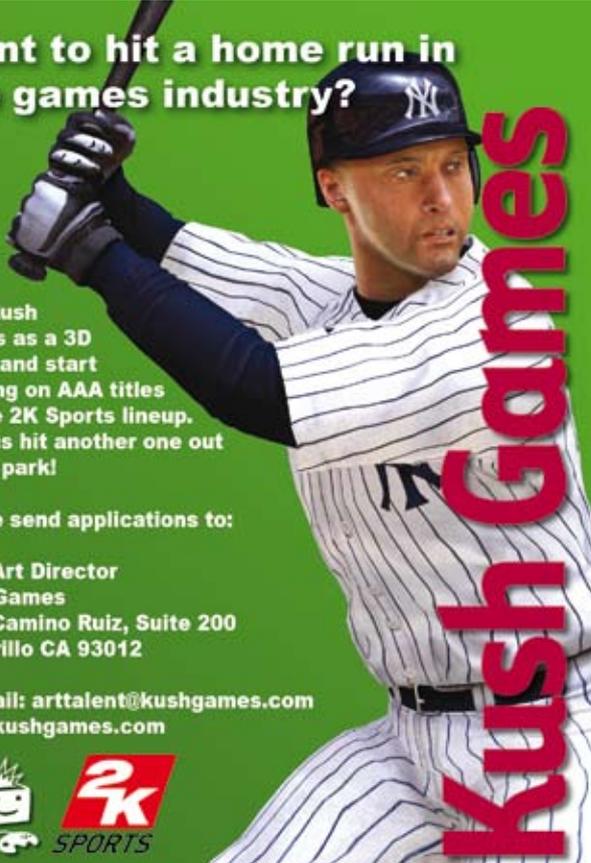

Human Resources
Krome Studios
PO Box 1639
Fortitude Valley 4006
Queensland, Australia

TM the Tasmanian Tiger and the Krome Studios logo are trademarks of Krome Studios Pty, Ltd.

Want to hit a home run in the games industry?

Join Kush Games as a 3D Artist and start working on AAA titles for the 2K Sports lineup. Help us hit another one out of the park!

Please send applications to:

Attn: Art Director
Kush Games
5155 Camino Ruiz, Suite 200
Camarillo CA 93012

or email: arttalent@kushgames.com
