WELCOME

to the second issue of 3DCreative Magazine
A digital publication for CG creatives around the globe.

3DCreative Magazine aims to focus on techniques, tutorials, interviews, articles, project overviews and galleries. We will have news and reviews too but we find that these topics are best covered by the online news and CG sites that thrive on daily updates. Our magazine will focus on becoming more of a timeless resource for artists to turn to again and again whether you view it from your screen or choose to print it off.

TECHNIQUES AND TUTORIALS

As packed as the first issue, one of this months continuing big selling points for many will be Michel Roger's famous 'Joan of Arc' tutorial, recreated for Maya, Lightwave, C4D & XSI and now onto part 2 : Modeling of the Head - Head, Ear & Assembly. 3DSMaxer's are treated to the second part of Richard Tilbury's 'Corridor

Series' (Which is not a dull as it sounds!) A character modeling tutorial called Vladoom by Ervald Kullolli and a Porsche 356 Modeling tutorial courtesy of Karabo Legwaila.

INSPIRATION

This month, Dario Piccau talks to us about his latest full length animated feature 'Dear Anne, The Gift of Hope', about the technology they are using and his own personal views on the ethos of the project. We also have interviews with artists Par Tingstrom and Michel Roger of 'Joan of Arc' Fame. And as usual, we have 10 of the best images in our gallery section.

INDUSTRY

A brief look at the Honda Civic, as it is Reborn in RPA's "Keyhole" Spot, Created Through A52's New Directorial Collective for Photoreal CGI Storytelling. Also, Part 2 of our 'Career in 3D Compuetr Graphics' Series which this month guides any hopefuls through the rigors of creating a Portfolio or Showreel.

Dont forget to take a look at Digital Tutors advert on page 12 and take advantage of 3DCreative's special 10% Discount!

So! Read on, be inspired, be enlightened and enjoy 3DCreative Magazine's second issue!

ABOUT US

Zoo Publishing is a new company comprising of a small team here in the Midlands UK. This magazine is our first project which we are hoping with the support of the community will build into a great resource and a highly anticipated monthly release. The 'Support of the Community' is an interesting point, where a 'magazine for 3d artists' is not an original idea, the marketing and distribution of this magazine as far as we know is a first. It follows the principle of traditional magazines that are sold on news stands and in many outlets but being a digital downloadable mag the many established web communities on the net are our outlets and newsstands. This first issue is supported by 3DKingdom.org, 3DLinks.com, 3DTotal.com, 3DValley.com, CGChannel.com, CGFocus.com, CGUnderground.com, Daz3D.com, Deathfall.com, the3DStudio.com and Vocanson.fr and we look forward to lasting and successful partnership with these CG community sites.

BEN BARNES Editor

Innovation

Innovative Integration.

New BOXX workstations run all your preferred visual computing applications with perfect finesse, plus blistering speed and stability. BOXX innovates leading edge technology to please your biggest skeptic, combining the industry's best microprocessors, graphics, I/O and storage with extraordinary world-class service and support.

BOXX workstations are propelled by single and dual AMD Opteron™ processors offering the flexibility to run 32-bit and 64-bit applications simultaneously. Opteron processors provide the assurance that solutions are compatible, reliable and stable, delivering high-performance computing with scalable solutions for the most advanced applications. Now you can easily transition to 64-bit computing and get outstanding investment protection without sacrificing existing hardware and software configurations. Go ahead. Exploit the 64-bit boundaries of your potential.

Add the secret sauce — choose NVIDIA Quadro FX by PNY Graphics boards — to own the ultimate 3D workstation.

Powerful. Integrated.
Reliable. Supported.

Interview

AN INTERVIEW WITH MICHEL ROGER

Hi could you tell us a bit about yourself?

I am 36, French, a senior modeller and I am working at Attitude Studio in Luxembourg. I have worked in the video games industry for several years and for the past 2 years for cinema and television (3D films and 3D TV series).

What first got you started in 3D?

I really started 3D in 1993 when I realized it was possible to make interesting things with a PC at home, not only with an expensive workstation. :) Back then I was really into comic books and I found that 3D was a good way to bring volume to my 2D drawings. I remember a 3D test film based on a comic book by Moebius which, unfortunately, was never achieved. It was really this kind of thing I was interested in 3D, much more than special effects.

You are most commonly known for creating your Joan of Arc scene and producing that hugely in-depth tutorial. Does this give you a great sense of achievement or do you get bored of being known as the Joan of Arc guy? Honestly, I never thought this tutorial would be such a hit and have such a long lifespan. I thought that eventually someone would come up with a better one and more in line with the techniques and tools available now (it was made with Max 3 and 4) but it does not seem to be the case. I don't consider this tutorial as a major achievement. It was something I did like that, just to help the French community

because most of the tutorials on the Internet were, and usually are, in English. To be honest, I have also learned a few things while making it. This character was in fact my first attempt using sub-division modelling. I sometimes happen to say « yet another Joan model ... » but I prefer taking this with humour. :)

Do you have plans on producing another

character that could rival the success of Joan? I could have written a lot more tutorials like this one with more complex characters, other techniques or software but it has to remain enjoyable to do and after that one, I chose to work on more personal projects. Sometimes I think I should really freshen up this tutorial but I don't because I lack both time and motivation.

You have worked for a few big name games

companies in the past and are now working for Attitude Studios as a senior modeller. Do you miss the games industry or are you happy with what you are doing at the moment?

I have no regrets for leaving the video games industry; I was getting bored of it. Not that I think it is not interesting but after several years I needed new horizons. For the past two years I have had the opportunity to work for Attitude Studio on a full 3D movie and a 3D TV series

(coming out in 2006).

I have learned a lot and met really friendly and talented people.

How long does it take to produce a character. From concept through to final rendering?

It depends on how complicated it is, but as a general rule, the more complicated a character the more you need to prepare it with sketches or low poly models for instance.

Then it depends on the inspiration (I am talking about personal projects here). You should give enough time to the character to mature. Be careful with your first attempt and do not hesitate to leave it aside for a while and get back at it later on.

So, it can take anywhere from a few days to a month or two.

You have worked with several different 3d software programs but could you tell us which one best suits your working style?

For the time being I would say Maya suits me well, I use it along with Zbrush to rough out volumes and I rework directly on the wire frame in Maya, with the Zbrush sketch as a guidance. This is only a matter of habit, I could as well use XSI or Max but at the moment, I am really comfortable with my customized settings in Maya. Other software offer the same tools and ability to customize the interface or keyboard shortcuts. The software is almost secondary, what matters the most is looking for the right shapes, volumes, the artistic rather than the technical side of the job.

What would be your ideal job?

I am in charge of the modelling team for the characters of the TV series I am working on and I really enjoy it. I don't want to do anything else at the moment. Make sure everything is fine and that what we model matches perfectly the graphical style of the character designer.

Make sure we have things well planned, work to deadlines, and, as long as it is possible, use at best the skills of the team members depending on their preferences.

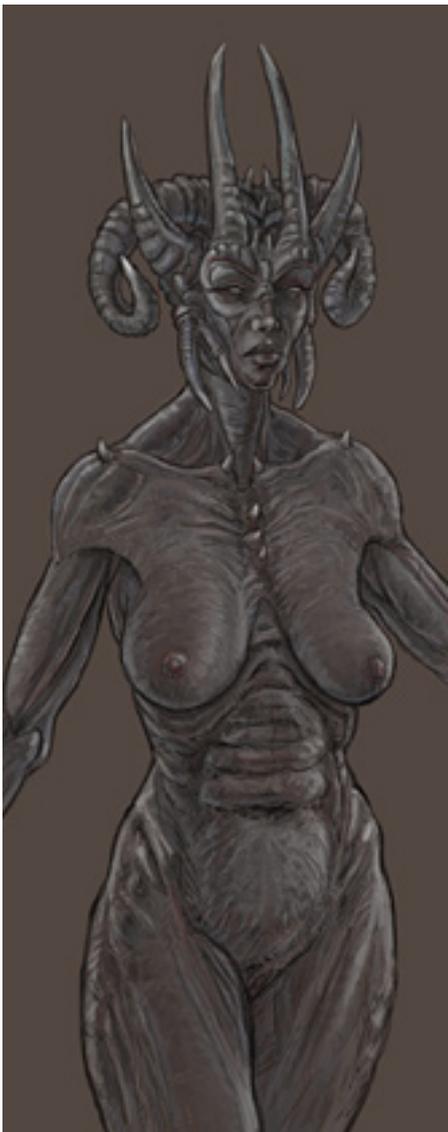

Where do you see yourself in a 10 years time?

Honestly I have no idea. I never had a career plan and I am not going to have one now. :) Maybe in something else than 3D but it is too early to talk or think about it.

Who inspires you artistically?

Traditional more than 3D artists: illustrators or photographers, painters or sculptors.

It is important, especially in 3D where it is easy

to have only 3D references, to open yourself to other areas.

What has been your greatest accomplishment to date?

Surely the opportunity to have been involved in the third full length CG movie in France, which should be released in cinemas in 2006.

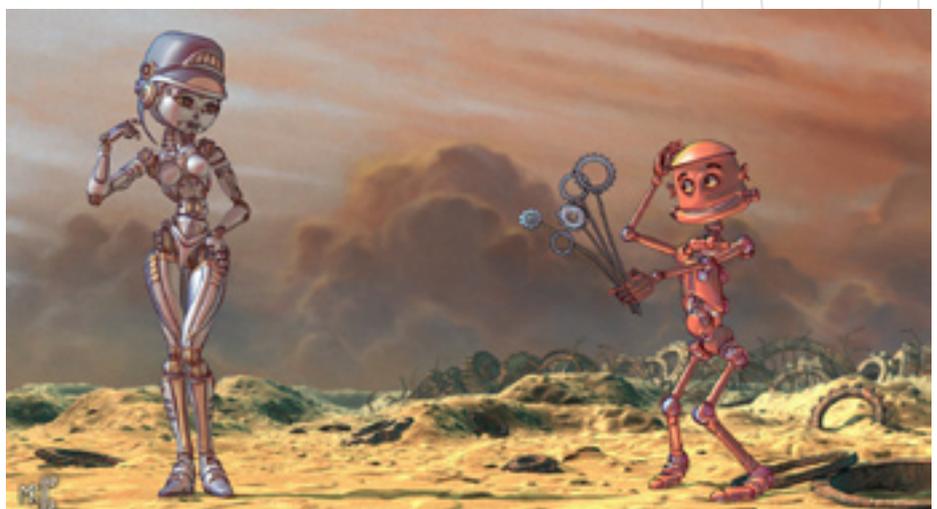

I was a member of the character modelling team and it was my first experience on this type of production. I never felt as motivated and happy to go to work every morning.

A great team, a challenging project, what else could you ask for?

What is one piece of advice you would give to any aspiring artist?

Get seriously into it, which means a lot of hard work but not only in learning 3D tools and techniques. If possible try yourself at different art forms such as drawing, traditional modelling or photography and develop a strong artistic knowledge base. And the most important is: never think « that's it, I'm good ». Always re-evaluate yourself and be humble as there are so many things to learn, it takes a lifetime.

VLADDOOM

POLY CHARACTER MODELING BY
ERVALD KULLOLLI

totalTextures

v1
General Textures
 A Collection of hi-res seamless textures covering a wide variety of subjects including many bonus features.

v6
Clean Textures
 Textures which are 'clean' textures that have little or no 'aged/stressed' elements.

v11
Alien Organic
 From the wierd and slimy, to more subtle toned skins, these textures are like nothing you have ever seen before.

v2
Aged & Stressed
 Meets the demand for stressed, aged, damaged and dirty textures. Again covering many subjects, being hi-res, seamless and having many bonus features.

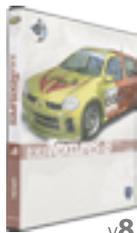

v7
Sci-fi Textures
 The textures range from Exterior Spaceship textures to decals and Damage maps

v12
Around the World Vol 1
 Mostly architectural textures, taken all over the world.

v3
Bases & Layers
 Base textures that are suitable for building up layers or applying straight to surfaces such as stone, plaster, concrete etc. This CD has many bonus features.

v8
Vehicle Textures
 The textures range from Tyre bump maps to cool flame decals. Included are .dxf meshes of some of the more 'common' car objects. These include Alloy Wheels, brake callipers, dials etc.

v13
Around the World Vol 2
 Mostly architectural textures, derived from original photography, taken all over the world.

v4
Humans & Creatures
 Suitable for texturing human and creatures. The textures range from natural, realistic eye, skin and hair textures to bizarre creature skins and eyes.

v9
Ancient Tribes & Civilisations
 The textures range from Aztec, Japanese, Medieval, Greek & Roman, Celtic & Viking, Egyptian, Neanderthal, Indian & Islamic, and African.

v14
Fantasy Textures
 Mostly fantasy textures some created from 100% original photography and others hand painted by our own texture artists.

v5
Dirt & Graffiti
 Dirt masks/ maps and graffiti. These have many uses, the main ones being as a mask to mix two textures together or being placed as a layer over an existing texture to add in detail and 'dirty it up'.

v10
Trees & Plants
 This DVD has trees based on the four seasons, and a variety of plants and grasses and leaves with each one with the very own alpha map which makes them ready to pop into any scene.

v15
Toon Textures
 Toon and stylised textures. The textures fall into 'sets' hand crafted by our artists, each set has a continious style throughout and contain colour and bump maps which range from leaves to tiles and from wood to windows.

A Superb range of 15 high quality texture collections for all purposes.

Built using a HTML interface which will run in any web browser on any platform.

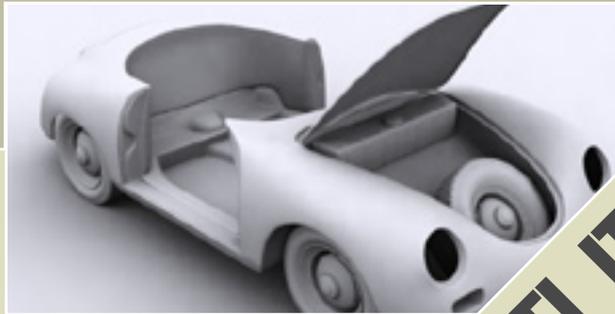

Full quality JPEG files making them compatible with all 2D and 3D applications.

Royalty free for use on any project commercial or otherwise & can also be modified.
